

BR Technologies

Since its founding by **Hugo Blume and Karl-Georg Redecker in 1948** our company is known as an expert for coil winding machines all over the world.

BR Technologies offers today fully automatic, semi automatic, and conventional coil winding machines to produce transformer coils, instrument transformer coils, high-voltage coils and similar goods. Also in our portfolio are foil winding machines and a broad range of accessories for winding machines.

Mechanical Engineering

We do not offer products off the shelf but only individually tailored designs which meet exactly your requirements. [read more ...](#)

Software

Our software allows to produce a whole spectrum of products on a machine without modifying programs. [read more ...](#)

Service

Our special: the combination of customized engineering and individual service. [read more ...](#)
