

## Basics

- Winding machine for gas-insulated bushings
- Fully automatic operation
- Winding of two insulation foils and one conductor foil (Al)
- Automatic conductor foil cutting equipment

## Options

- Edge folding unit
- Storage for metal sheet coating
- Device for avoiding electrostatic charging
- Automatic traverse feed control
- Slit cutting for end foil connection

### Basic Data

Coil diameter	160 – 500 mm / 6.3” – 19.7”
Coil height	Max. 4,000 mm / 175.5”
Total coil weight	Up to 350 kg / 770 lbs
Winding speed	Max. 100 rpm

### Foil

Insulation foil width	270 – 400 mm / 10.63” – 15.75”
Conductor foil width	250 – 400 mm / 9.85” – 15.75”

Machines with different specifications are available on request.
